

Dreamweaver Training

Adobe Dreamweaver is one of the industry's leading web authoring tools for building world-class websites and applications. Cascading style sheets (CSS) are the modern standard for website presentation, controlling such things as borders, spacing between paragraphs, headings or images, control of font faces or font colors, background colors and images. Join us for this six session webinar training where you will discover how to:

- Create rich, aesthetically compelling web designs in Dreamweaver
- Drastically reduce the cost of building and maintaining your website
- Analyze your code to ensure that it is done correctly and efficiently
